LETTER OF TRANSMITTAL

WAR DEPARTMENT,
ARMY MEDICAL LIBRARY,
May 11, 1937.

Major General CHARLES R. REYNOLDS,
The Surgeon General, United States Army.

GENERAL:

I have the honor to report the completion of the Second Volume of the Fourth Series of the Index Catalogue of the Library of the Surgeon General's Office. The work of the preparation and printing of the Index Catalogue has gone on steadily ever since it was taken over from my predecessor, who completed Volume 1 last May. The present work consists of 1,104 pages as compared with 897 pages in the previous volume. With the existing staff and the facilities for printing and setting the complicated type of this most elaborate work, approximately one year is required to complete a volume the size of the one just issued. As scientific contributions to medicine have become increasingly complicated, the work of classification has become much more laborious. While at times it seems as if the Catalogue, which goes on in an unending cycle, should be printed somewhat more rapidly, it may be said that there is no royal road to this end and it is only by the most painstaking care and attention to detail that its continued enviable reputation and success can be assured.

At the time that the books of the First Volume of the Fourth Series were ready for distribution a letter was included with each one sent out, inviting constructive criticism which might make advisable still further changes in the format. The result of the criticisms received has been to cause certain changes in the type used for the authors' names in journal references, which will be inaugurated in Volume 3 of the Series. This change of type will afford better contrast and will be much easier on the eyes of those using the Catalogue.

The Library now contains 400,299 volumes, of which 349,000 are bound, and 568,590 pamphlets; in all, 968,889 volumes and pamphlets.

The following table shows the number of titles in the Index Catalogue, as far as published:

	Author titles	Subject titles	
		Books	Journal articles
First Series (16 volumes).....	176,364	168,537	511,112
Second Series (21 volumes).....	169,812	136,405	645,557
Third Series (10 volumes).....	88,876	57,034	603,600
Fourth Series, Volume One.....	2,779	4,454	71,168
Fourth Series, Volume Two.....	8,892	3,631	79,874
Total to date.....	446,723	366,430	1,911,311

On pages [1]–[98], will be found a check-list of abbreviated titles of journals, which have been currently received and indexed in the Library since 1919, and to which references can be found in the Fourth Series of the Index Catalogue. The

check-list also includes the synopsis of style and the rules observed by the Library in abbreviating the titles of the periodicals. A list of the commoner abbreviated words to be used throughout the Fourth Series precedes the check-list of journals. An analytical descriptive catalogue of all periodical publications possessed by the Library will appear in a subsequent volume of the Index Catalogue.

Since the publication of Volume 1 of the Fourth Series the Library has acquired by gift and purchase 14,670 items (books, pamphlets and theses) on medicine and allied sciences. Approximately 62 percent of these are works in English, 20 percent in German; 9 percent in French; 7 percent in Italian; and the remainder 2 percent in miscellaneous languages. The number of journals which the Library receives is 1,825. It will probably be advisable to increase this list somewhat, as other journals are found to contain matter which is worthy of being listed in the Index Catalogue. In this respect the Library endeavors to err on the side of liberality and subscribes even to journals which seldom contain anything of medical value, rather than to miss the occasional article which should be listed.

At the present time the Library is engaged in having a limited number of bibliofilms made of some representative books, both old and new, including a complete reproduction of Volume 1 of the Fourth Series. It is hoped that in the future it will be possible to supply libraries throughout the country with photographic reproductions of rare books which are ordinarily unavailable.

The edition of the Catalogue is limited by Congressional appropriation to one thousand copies. These are distributed both in this country and abroad to institutions which maintain medical libraries, to universities, medical schools, medical societies, etc., which furnish facilities to medical men desirous of using the Index Catalogue. It is also supplied to large institutions and facilities of the United States Army, Navy, Public Health Service, Veterans' Administration and the numerous Government institutions and Departments. The geographic distribution of the Catalogue is a matter of some importance, and it is always desired to place it in many different points so as to afford access to the largest number of professional men possible. The demands made for the free distribution of the Catalogue are very considerable and these include many individuals who often wish to secure a private library of their own. It is not possible for the Library to favorably accede to these latter requests, but every effort is made to have the Catalogue available to those who wish to use it. Unfortunately the edition of sale copies of Volume 1 of the Fourth Series was so limited that the complete edition was sold out almost immediately. The Library has been informed that 200 sale copies of the Second Volume are available at the Government Printing Office, and that 300 of the Third and subsequent Volumes will be available.

On November 16, 1936, the one hundredth anniversary of the foundation of the Library was celebrated at the Library before an assemblage of more than five hundred distinguished guests. This celebration marked, as has been said, an important milestone in the life of the Library. The outstanding feature of the celebration was the oration delivered by Sir Humphry Rolleston, Bart., G. C. V. O., formerly Regius Professor of Physic at Cambridge University, who came from England for the purpose. A complete account of the celebration ceremonies has been compiled in a bound volume which will shortly be ready for distribution.

Very respectfully,

HAROLD W. JONES,
Colonel, Med. Corps, U. S. Army,
The Librarian, Army Medical Library.

SYNOPSIS OF STYLE
WITH A
LIST OF ABBREVIATIONS
FOR
SERIAL PUBLICATIONS
INDEXED IN THE
FOURTH SERIES
OF THE
INDEX - CATALOGUE *

To be a guide for medical research is the primary object of the Index-Catalogue. The Library, which issues it, and the Government which appropriates money for the expenses of this national institution and its publication, are fully aware of the international importance of this catalogue. In forty-nine volumes, on 46,768 pages, the Index-Catalogue lists almost two and one-half million books and journal articles related to medicine and allied sciences, which are published in many countries of the world. This vast amount of medical bibliographical material has accumulated chiefly during the last sixty years. Without a guide-book and without a proper classification of these literary products it is impossible for any medical research worker to penetrate his subject thoroughly or to avoid repetitions in his investigations.

To serve as an inventory for the Army Medical Library is the secondary aim of the Index-Catalogue. The Library has now grown up and has reached a point where it can easily consider itself the greatest center of documentation in the field of medicine, since all the two and one-half million journal articles and books listed in the Index-Catalogue are in its possession. With so great a treasure as a basis for its undertakings, the Library is now in a position to make further plans for the development of medical bibliography and reference work.

As an index to the medical literature, past and present, the Index-Catalogue refers to books and journals, to chapters in books and to articles in journals, the exact number of the volumes, parts and supplements of these publications, and, finally, to the pages on which the needed information is to be found. As a catalogue of the Library the Index-Catalogue lists books and pamphlets under the names of their respective authors, serial publications under the names of corporate bodies or under their titles, with the necessary collation and imprint. Both the Index and the Catalogue are arranged in a single alphabet of authors and subjects.

Its double purpose caused the Index-Catalogue to develop a style of its own for the cataloging of books, for the references to books and journals, and for the differ-

*For abbreviations formerly used, see Series 1, Volume 16, Series 2, Volume 21, and the lists given in the volumes of the Third Series of the Index-Catalogue.

entiation of that portion relating to cataloging from that devoted to references only. This is accomplished by various types of printing. Since 1880, when the very first volume of the Index-Catalogue was published, our ideas on book cataloging and bibliographical reference work have been changed considerably, and it was natural that the Index-Catalogue changed its style from time to time.

The following pages briefly describe the style of author entries and references, the arbitrary rules for making abbreviations for journal titles and for other single words, the use of numbers in dates and paginations, the punctuation, capital and small letters, and the style of printing of the Fourth Series of the Index-Catalogue.

The Synopsis of Style is followed by three lists: (1) Dictionary of abbreviated and contracted words; (2) Abbreviations of titles of serial publications; (3) Index to abbreviations of publications of corporate bodies. All three lists are alphabetically arranged. The dictionary contains the most commonly used abbreviated words occurring in the Index-Catalogue. It is intended to be for the use of the Library staff. The list of abbreviated titles includes all serial publications which have been current in the Library since 1919. Its purpose is solely to be an explanation of the abbreviated titles, and unnecessary data have been therefore omitted. The list shows the abbreviation, the short title of the corresponding journal, and the place of publication (or the place where the journal is entered as a second-class matter). The third list includes corporate bodies as authors, whose name is an intimate part of the journal title. The numbers in this list refer to the list of abbreviated titles in which the entries are numbered consecutively.

SYNOPSIS OF STYLE

1. Alphabetical and chronological arrangement.

All matter is arranged in alphabetical order. Authors, title entries, geographical names and subjects of the same name are arranged in the order mentioned. Hyphenated words, compound words, and compound proper names are treated as one word. Author names with names of joint authors are considered as one word. In title entries, articles, prepositions, and conjunctions are not taken into account in the alphabetical arrangement.

Several works of one author are chronologically arranged in the author entries with the exception that the works of authors dead before 1880 are alphabetized. "Opera omnia" precede editions of single works, and single works precede anthologies. Subsequent editions immediately follow the main entry in chronological order. They are printed in one paragraph. Translations are next, in new paragraphs beginning with the note "The same" and containing the translated title. In case of incunabula, or where the title of a subsequent edition greatly differs from the main entry, each edition is entered in a separate paragraph.

Under subject headings, the various divisions of the subject are in alphabetical order. Within a division, the book references are first alphabetized, each having a separate paragraph. Journal entries follow, arranged in a single paragraph in the alphabetical order of authors. Several articles of the same author are chronologically arranged, the oldest publication being listed first. Articles published in the same year by one author are printed in the alphabetical order of the journals.

2. Author entries.

Author entries begin with the family name of the author followed by the full Christian names, which are not abbreviated unless the full name could not be ascertained. Surnames with prefixes are treated according to the library method of the author's home country. In general,

the French “de” without the article, and the German “von” are placed after the Christian names. Otherwise, the international rules of cataloging are observed. The author’s name is occasionally followed by epithets or other necessary additions. The name proper, including the Christian names, is printed in the same style of type, and whenever it could be ascertained, the date of birth and death is added to the author’s name, e. g., **STANLEY**, Sir **Henry M[orton]** 1875–1922.

Corporate bodies as authors are entered chiefly under names of countries, states, cities, towns, etc., when such geographical names (nouns or adjectives) form part of their titles, or when the corporate body is strictly bound to some locality. Internationally known institutions whose name begins with a proper noun (or adjective) are entered under the first word of their names. References are made for all other names by which the corporate body is known. If the name of an association or institution is not preceded by a geographical noun it is printed in (Case 130)† the first word capitalized throughout.

The author’s name is followed by the list of his books lately acquired by the library. The title of a book is always given in the original language; if necessary, the English equivalent of the title is added in brackets. For books translated from foreign languages the original title of the work is added in brackets, if it could be ascertained. Particular care is taken to preserve the archaic forms in titles of old books.

The title of a book is followed by a statement specifying the edition, in the language of the book. The collation is in English in the following order: volumes, paging, illustrations, size. Paging is shown only for works of less than three volumes. Illustrations are counted in the following order: illustrations, plates, photographs, portraits, maps, plans, facsimiles, tables, diagrams. If there is but *one* portrait, plate or other matter included in the collation the number is omitted. The size, at present, is in the old style of designation by 8°, 4°, fol., etc. This will eventually be replaced by giving the height of book in centimeters.

The imprint follows the collation. It includes the place of publication given always in the vernacular, the name of the publisher, and the date. Abbreviations and omissions are made in the collation and imprint whenever feasible. In a separate paragraph, printed in 6-point, various notes are sometimes added, or the volumes of a serial publication are enumerated by their short titles and individual authors.

In all 8-point author entries additional editions of a publication by the same author are printed in the paragraph of the original work, with the exception specified under 1. The new edition is separated from the main entry by the word **ALSO** set in capital and small capital letters.

Under the name of an author, following the list of his works, but before his works with joint authors, references relating to his biography and literary activity are printed in a separate 6-point paragraph: books first, then the journal references preceded by a dash and the words “See also.” The biographical paragraph is sometimes preceded by a separate 6-point paragraph of references to other author entries.

Book entries under subject headings differ but slightly from the main author entries. The author’s name carries only the initials of the Christian name, the subtitle of the book being omitted. The edition as well as the volume, paging, and size are indicated. The illustrations and the name of the publisher are not mentioned. The

3. Books under subject headings.

† This and similar expressions in the Synopsis of Style refer to the United States Government Printing Office Type Book (Washington, 1931). The bold-faced type used in the Index-Catalogue is known as “Century Bold”. Case 129 of this type is 6-point, Case 130 8-point, Case 131 10-point.

name of the author (personal or corporate) or, in case of anonymous books and journals, the full title is printed in 8-point capitals and small capitals.

4. References to books. A reference to a book contains all the parts of a subject book entry. If the reference is made from an author to the work of another author, it is introduced by a "See" or "See also." The reference is printed in a 6-point separate paragraph, with the initials of the author's Christian name in Roman letters, while the surname is in bold-face type. If the reference is made to chapters of a book under a subject heading, the author's name is given first, then the title of the chapter, the title of the book preceded by "In" and followed by the name of the author of the book in parenthesis, the statement of edition, place of publication, date, volume number followed by a colon, number of part or supplement, and pagination. If the author of the chapter and that of the book are the same an introductory "In his" before the title of the book is all that is needed. The title of the book may be shortened.

5. References to journal articles. A reference to a journal article contains the surname of the author with his initials and occasional prefixes, the full title of the article in the original or in translation, the abbreviated title of the journal or serial publication, the place of publication if necessary, the year, volume number in bold-face type followed by a colon, statements on parts or divisions of the journal, the pagination, and the number of illustrations. This may be followed by reference to discussion, to two other journals at which the article was published, and to reprints if they are available at the Library.

In articles published in a series, the subtitle of the series often differs greatly from the main title. Since the article is classified according to its subtitle, results of a serial investigation are widely scattered in the catalogue. If they happen to come under the same subheading, the main title is mentioned only once.

In general, titles in English, French, German, Spanish, and other Roman languages are given in original; others are usually translated. In transactions of societies the abbreviated title of the journal is immediately followed by the date of the meeting, if this is different from the date of publication. In subsequent references the title of the journal, the place, year and volume number may be omitted if they are the same as found in the preceding reference. The repetition is indicated by "Ibid."

6. Abbreviations, contractions, and omissions. References and author entries in a printed catalogue must necessarily have many words shortened by abbreviation, contraction, or omission. There are certain words and phrases frequently occurring in the collation, imprint, or journal references, which if printed in full, would needlessly encumber the catalogue. Economy also demands the use of shortened words and symbols.

Words can be shortened by abbreviation, contraction, and omission, the difference between them being that a contracted word always includes the first and the last letter of its original. Contracted words, therefore, do not need any period after them. "Ztg" is the contraction for "Zeitung"; "Bd" for "Board"; "Ergänzb" for "Ergänzungsband"; "Cie" for "compagnie." Abbreviated words always carry a period, and contain only part of the first half of the original. Some of them are simple abbreviations; others are abbreviations combined with contractions. "Facs." is a simple abbreviation for "facsimile"; "ed." for "edition" or "editor" or "edited"; "Gior." for "Giornale". "Sitzber." is a contracted and abbreviated form of "Sitzungsberichte"; "Zschr." of "Zeitschrift". Omission is used to shorten names composed of several units; thus, the name of Rio de Janeiro is shortened to "Rio".

Not only words but consecutive numbers can be contracted in dates or in paginations as 1843-90; 1917-18; 1920-21; 10-2; 1996-9. Such contractions, however, are impossible in cases like 978-1002 or 1999-2000.

The general principle of shortening words is that the artificially created word should be selfexplanatory either alone or in its relations. Another rule which should govern the composition of shortened words for an international catalogue is that cognate words in all languages should be reduced to the same form, if this is possible with due consideration for the linguistic and orthographic characteristics of foreign words. International words are very common in medical nomenclature, and it is quite simple to reduce them, in the case of many languages, to their common root.

Some words can be abbreviated more than others without any misunderstanding. This depends upon the particular place in the catalogue where the abbreviation is used. Single-letter abbreviations are very clear in the collation of books, or at the head of short titles of journals. Where pagination or volume is expected, "p." or "v." are easily understood; where the word "Journal" is expected, "J." will be found entirely adequate.

Generally, the abbreviated word contains more than a single letter, and it usually ends with a consonant. No attention is paid to grammatical endings, suffixes, or signs of declination of a word. Abbreviations, therefore, are grammarless, and cannot be read without a certain knowledge of languages. Except in very rare cases, an abbreviation or contraction is used only for one word, and a word is abbreviated to the same short form.

7. Shortened titles of serial publications.

Titles of journals are shortened by abbreviation, contraction, or omission of words. The general principles of these methods are described under 6. The leading rule is to shorten the title only to such an extent that the country of publication is easily recognized without the addition of the place of publication; that the subject of the journal stands out; and that the journal cannot be confused with others. Geographical nouns occurring in the title of the journal are, therefore, not abbreviated except United States to "U. S.", United Kingdom to "U. K.", and the first half of compound geographical names as New York to N. York, or North Carolina to N. Carolina. These abbreviations differ from those used for names of cities as places of publication.

Certain journal titles are not abbreviated: (a) single-word titles, (b) titles in Asiatic languages unless such journals carry also an international title, (c) short titles consisting of 2 or 3 words in unusual relation to each other as in *Animal Defender*, or *Contact Point*.

The shortened title is made from the main title of the journal, except in periodicals for which a well-known short title is generally accepted. The abbreviated title maintains the same sequence of words as the original with the exception of words that can be omitted. In publications of corporate authors the abbreviated title usually begins with the generic name of the periodical regardless of its position on the title page of the serial publication.

Certain words are omitted from the shortened title. Conjunctions are generally disregarded, except in the few cases where they connect two equally important nouns of a title. Phrases equivalent to a genitive, unessential titular adjectives, nouns denoting administrative divisions, unless parts of a name, all prepositions, definite and indefinite articles are omitted. Long titles are curtailed, and the second half of the title is partly or entirely disregarded, especially if it consists of words expressing

subjects closely related to the first part of the title. "Archives des maladies du coeur, des vaisseaux et du sang" is shortened to "Arch. mal. coeur". In periodicals with two or more generic names connected with a conjunction only the first of these names is included in the shortened title, e. g., "Acta et commentationes . . ." as "Acta"; "Bulletins et mémoires . . ." as "Bull."

8. Omission of the place of publication in journal references.

The two reasons of adding the place of publication to a shortened journal title in references are, (a) to recognize the country of origin and the language of the journal, (b) to avoid confusion with journals of an equal or very similar shortened title. When the journal title in its abbreviated form contains geographical nouns or adjectives, unique proper names, or words characteristic of a definite language, the place of publication is not added to the reference. The language of the journal can be sometimes easily recognized from the shortened title, and it is assumed that journals with English titles are published in the United States, those with Russian terms come from Russia, those with French words are printed in France, and so on. If a journal is published elsewhere than in the country which its language would reveal, or if the journal is the publication of a local society or a local corporation, the place of publication is added to the shortened title unless a geographical noun or adjective, or a unique proper word in the title makes the place of publication superfluous in the reference.

If the shortened title of a journal is readable in more than one language, if the origin of the journal is revealed only by a single accent of an abbreviated word, or if there are several journals with similar titles, the place of publication is added to the reference.

No place of publication is needed in references to journals with shortened titles like

Acta med. scand.,
Am. J. Hyg.,
Arch. fr. belg. chir.,
Arch. fr. path. gén.,
Arch. ital. anat.,
Bol. As. méd. argent.,
Bull. Soc. zool. France,
Bull. U. S. Nat. Mus.,
Deut. Mschr. Zahnk.,

J. Maine M. Ass.,
Med. iberica,
Norsk mag. laegevid.,
Nurs. J. China,
Philippine J. Sc.,
Proc. Akad. wet. Amsterdam,
Pub. Colorado Coll.,
Rev. méd. Barcelona,
România med.,

which all contain a geographical noun or adjective of the country or city where they are published.

The occurrence of a unique proper name makes the place of publication superfluous in references to journals like

Acta Soc. med. Duodecim,
Aichi J. Exp. M.,
Arch. Julius Klaus Stift.,
Bull. Moses Taylor Hosp.,
J. Ayurveda,
J. R. Army M. Corps,
Linaere Q.,
Sind M. J.,
Sudhoffs Arch., and similar others.

No place of publication is generally added to journal references beginning with Abh., Atti, Boll., Beitr., C. rend., Erg., Gazz., Gior., Rass., Riv., Wschr., Zbl., Zschr., Ztg or containing tschr., tskr., and other words characteristic of a definite language as

Abh. Geburtsh.,
Aerztl. Rdsch.,
Allatorv. lap.,
Année biol.,
Biol. Zbl.,
Borba s tuberk.,
Cas. lék. česk.,
Cervello,
Erdball,
Gazz. internaz. med. chir., and so on.

The place of publication is an important part of the reference to journals like

Acta aerophysiol., Hamb.,
Acta biol. exp., Warsz.,
Aerztl. Prax., Wien,
An. Direcc. san. nac., Caracas,
Ann. ocul., Par.,
Arch. biol., Genova,
Arch. M. Hydr., Lond.,
Bol. Asist. púb. nac., Montev.,
Bull. Soc. nat. chir., Par.,
Cellule, Louvain,
Dent. Bull., Wash.,
Fol. med., Nap.,
Fed. Counc. Bull., N. Y.,

Heart, Lond.,
Hyg. scol., Par.,
J. Med., Cincin.,
J. Psychol. Neur., Lpz.,
J. psikh. nevr., Moskva,
Jap. Zschr. Naturwiss., Jena,
Kyklos, Lpz.,
Progr. méd., Par.,
Progr. Med., Phila.,
Rass. mens., Tor.,
Rev. méd., Par.,
Rev. méd., Puebla, and so on.

9. Capitalization.

In author entries, the surname of the author is in capital letters. In compound names of authors not connected with a hyphen and in title entries only the first word is fully capitalized. Capitalization of other words follows the custom of the various countries; thus, German nouns are capitalized. In capitalization of botanical and zoological terms the international rules are observed.

In journal references the abbreviated words are always capitalized for short titles of journals in the English language. In German abbreviated journal titles the nouns are capitalized. In other languages only the first word, single-letter abbreviations, personal and geographical nouns, and the first word of the name of a corporate author are capitalized. Abbreviations for places of publication are printed in capital letters.

10. Punctuation.

Double punctuation is avoided as much as possible, and a bracket or parenthesis, where it occurs, will eliminate a comma or semicolon, even a period, where this is not a sign of abbreviation.

In author entries a comma separates the surname or initial from the Christian name, the Christian name from the epithet, the epithet from the date, the Roman numbers from the Arabic numerals in the collation, the place of publication from the publisher's name, and the publisher from the date of the imprint. In case of joint authors the comma is used for separation except before an ampersand (&) preceded by a surname when the Christian name is omitted or preceded by a

dash. In journal references the title of the journal, the place of publication, the year and the volume are separated from each other by commas.

The period is used after all abbreviations, but not after contractions. It separates the name of the author, or authors, from the title unless the author's name is followed by the year of birth alone with a dash. In such cases a 3-em quad is between the dash and the book title. The title of a publication is usually followed by a period, sometimes by a question mark. A period shows the end of the entry or of the reference.

The semicolon is used before subtitles, between different paginations or paginations of different volumes. A semicolon separates statements as to foreword, commentaries, etc., from the book title proper. The colon is used after volume numbers in references, and, like the number itself, is printed in bold-face type. Parentheses are used wherever they occur in the original title of a publication. Also the name of an author is in parentheses when it occurs after the title of a book in references. Brackets are used, either in the title or in the references, for matter supplied by the Library. In subject headings brackets include synonyms and other matter related to the heading. Hyphens are omitted from French Christian names, and capital letters are not accented in any language.

11. Dashes. To avoid repetition of names, a 2-em dash is used for author or authors in 8-point text, and a 3-em dash in the 6-point paragraph, if the authors are the same as in the preceding entry; an endash is used to connect different numbers in references and dates. If any change occurs in the names of the next entry, all author names are repeated, unless the name of a joint-author can be added to the dash with an ampersand (&) sign.

A flush 2-em half-blunt dash is used before subdivisions of subjects. It replaces the main heading of the subject. A 3-em dash separates different editions of the same work printed in one paragraph with the main entry. An em dash is used to separate journal entries; this dash should never begin a line.

12. Type, indentions, leads, quads. Subject headings and author names in author entries beginning a column are set in 10-point (*Case 131*) capitals, flush in the folio line above each column. This is also done where a subject or the works of an author continue from the preceding column. Subject headings are set flush, first word in 10-point (*Case 131*) capitals; subheadings are set in 8-point (*Case 130*) and overruns are indented 1-em. In author entries or when the subject is a person's name, the name is set in 8-point (*Case 130*) with a 1-em indention. Excepting subject headings, everything else is set in shorter or longer paragraphs, 16-pica measure. Paragraph indentions are 1-em.

If the biographical date of an author-entry contains only the year of birth, a 3-em quad is placed after the dash and before the title of the book. When this occurs with the first of joint authors, a 2-em quad will be used in place of the missing date. A 2-em quad replaces also the missing date of birth when only the year of death is given.

A 6-point slug above, and a 2-point lead below flush headings and 8-point (*Case 130*) subheadings are used. No lead is needed after "See also" references. Six-point annotations are separated from 6-point journal entries by a 2-point lead, which is used also when a 6-point paragraph is followed by 8-point text.

The abbreviations "p." (page) and "v." (volume) always bump with figures they precede or follow. The volume numbers are set in bold-face type in all cases. Roman numbers when they indicate volumes are changed into Arabic numerals.

13. Transliteration of names in Slavic letters.

Various reasons make it necessary to transliterate names of authors and journals in Slavic characters as simply as possible. Therefore, the use of diacritical marks is entirely avoided, and no attempt is made toward a graphical transcription of the many shades of Slavic pronunciation. In general, the rules of the United States Geographical Board are followed with the exception that both И and Ы are transcribed as "i"; Ж as "zh", sometimes "j"; Ъ as "y"; Ю as "iu"; Я as "ia;" ИИ as "y" in endings; and ИЯ as "ia". Names of non-Russian authors occurring in Russian journals are retransliterated to their original forms. Foreign transliterations of Russian names, especially those in French and German, are changed into English spelling, e. g., Tchebotarevitch(fr.), or Tschebotarewitsch(germ.) as Chebotarevich; Chicobaloff(fr.) or Schichobalow (germ.) as Shikhobalov.

Alumni (or alumnae)	(not abbreviated)	avance.....	avancement
Am.....	American	Avenir.....	(not abbreviated)
Ambul.....	ambulant	Aviat.....	aviation
amer.....	americano (in titles other than English)		
Amst.....	Amsterdam	B	
An.....	anais; anaes	B.....	book; Buch
Anaesth., Anesth.....	anaesthesia; anaesthetics	b.....	biology or biologie (only at end of abbreviated compound words as Mikrob., Rassenb.)
analyt.....	analyticus ³	b.....	burg or berg (at end of geographic names)
Anat.....	Anatomie; anatomy; anatomical; anatomisch	Bact.....	bacteriologic; bacteriology
angew.....	angewandt	B. Air.....	Buenos Aires
Anh.....	Anhang	Baln.....	balneology
anim.....	animal; animale	Balt.....	Baltimore
Ann.....	annaes; annales; annali; annals	Barcel.....	Barcelona
Ann Arb.....	Ann Arbor	Barth.....	Bartholemew
Année.....	(not abbreviated)	batt.....	batteriologia
Annot.....	annotatio; annotation	B. C.....	Before Christ (in dates)
Annuaire.....	(not abbreviated)	Bd (no period).....	Band (never in journal titles)
Annual.....	(not abbreviated)		

* The first column of the list gives the abbreviated word in a form as it occurs somewhere in the Index-Catalogue. Only the letters of the abbreviation are invariable, while their accents and capitalization will vary according to the rules set forth on the preceding pages. The second column includes only a few selected samples of the many equivalent cognate words, and their grammatical modifications.

Bd (no period)---	board (in journal titles usually preceded or followed by "health", "regents", "visitors" and alike)	Certif.-----	certified
bearb.-----	bearbeitet	česk.-----	česky
Behandl.-----	Behandlung	ch.-----	chart
Behav.-----	behavior	Charakt.-----	Charakterologie
Beih.-----	Beiheft (never in abbreviated journal titles)	Chem.-----	chemical; chemistry
Beiheft.-----	(not abbreviated when part of title)	Chemother.-----	chemotherapy
Beil.-----	Beilage	Chic.-----	Chicago
Beitr.-----	Beitrag (mostly for Beiträge)	Child.-----	children
Bekämpf.-----	Bekämpfung	Childh.-----	childhood
Belg.-----	belges (in fr. "belg.")	Chin.-----	Chinese
belge.-----	(not abbreviated)	China.-----	(not abbreviated)
Benef.-----	beneficencia	Chir.-----	chirurgical; chirurgie; Chirurgie; chirurgicus ³
Ber.-----	Bericht; beretning; berätelse	Chiropod.-----	chiroprapist
Berl.-----	Berlin; Berliner	Chron.-----	chronique
Bevölk.-----	Bevölkerung	cienc.-----	ciencia
bezopass.-----	bezopassnost	Cincin.-----	Cincinnati
Bibl.-----	Bibliothek; bibliotek	Cinemat.-----	cinematography
Bibliogr.-----	Bibliography	cir.-----	cirugía (only when combined with "med.")
Bijdr.-----	Bijdrag	Circ.-----	circular
Bimonth.-----	bimonthly	cirug.-----	cirugía (only when not combined with "med".)
Biochem.-----	biochemical; Biochemie; biochemistry	Cl.-----	class; classe
biochim.-----	biochimico	Clevel.-----	Cleveland
Biogr.-----	biography	Clim.-----	climatologia
Biol.-----	biology; Biologie	Clin.-----	clinical; clinica
Biophysics.-----	(not abbreviated)	Co.-----	county (usually preceded by a proper name; in names of publishers it indicates Company)
Birm.-----	Birmingham	col.-----	colored; column (never in journal abbreviations)
Bl.-----	Blatt; blad	col.-----	colonial (in journal abbreviations)
Bol.-----	boletim; boletin	Col.-----	Colegio (always with capital letter)
bolez.-----	bolezni	Coll.-----	college
Boll.-----	bollettino	Collect.-----	collected; collection
Bologna.-----	(not abbreviated)	Colt.-----	cultura
Bord.-----	Bordeaux	Com.-----	comisión; commission; commissioner; committee
Bost.-----	Boston	Commun.-----	communication
Bot.-----	botany	Comp.-----	comparative
Br.-----	branch	Conf.-----	conference; conferencia
brasil.-----	brasileiro	Congr.-----	congress; congrès; congresso, etc.
Bratisl.-----	Bratislava	Cons.-----	consejo
Bresl.-----	Breslau	Conserv.-----	conservation
Brit.-----	British	cont.-----	continuation; continued
Brnschw.-----	Braunschweig	contemp.-----	contemporanea
Bronchosc.-----	bronchoscopic	Contr.-----	contribution
Brux.-----	Bruxelles	Contracept.-----	contraception
Bucur.-----	Bucurest	Convent.-----	convention
Budap.-----	Budapest	cost.-----	costituzionale
Bul.-----	buletinul	Counc.-----	council
Bull.-----	bulletin	couron.-----	couronnés
Bur.-----	bureau	C. rend.-----	compte rendu
burgerl.-----	burgerlijk	Crim.-----	criminal; criminology

C

Cah.-----	cahier
calam.-----	calamity
Calc.-----	Calcutta
Cambr.-----	Cambridge
Canad.-----	Canadian
Cancer.-----	(not abbreviated)
Card.-----	cardiology
Cas.-----	časopis
Cáted.-----	cátedra
Cath.-----	catholic
čech.-----	čechoslovakis
Cellul.-----	cellular
Cens.-----	census
Cent.-----	century
Centr.-----	central

d.-----	dorf (at end of geographical names as Düsseldorf)
Darmst.-----	Darmstadt
décad.-----	décaire
demogr.-----	demography; demografia
Denkschr.-----	Denkschrift
Dent.-----	dental; dentistry

D

Dentist	(not abbreviated)
Dep	Department
derm	dermatologicus ³
Desinfekt	Desinfektion; Desinfektor
Detr	Detroit
detsk	detsky
Deut	deutsch
Develop	development
diät	diätetisch
Diagn	diagnosis; diagnostics
diagr	diagram
diergeneesk	diergeneeskunde
Diet	dietary; dietetic
diger	digerente
Digest	(noun; not abbreviated)
Digest	digestive
Dir	director
Direcc	dirección
Direct	dirección
Dis	disease
Diss	dissertation
Div	division
dośw	doświadczenie; doświadczenie
Dr (no period)	Doctor
Dresd	Dresden
Druggist	(not abbreviated)
Dubl	Dublin
Düsseld	Düsseldorf

E

East	(not abbreviated)
Eclect	eclectic
Econom	economic
Ed., éd	edition; editor; édition
Edinb	Edinburgh
Educ	education
Egy., or egy	egyesület; egylet
Egypt	Egyptian
eidg	eidgenössisch
ejérc	ejército
eksp	eksperymentalny
électr	électricité
Electron	electronic
Electrother	electrotherapy
Embryol	embryology
Endocr	endocrine; endocrinology
Endow	endowment
enf	enfant
Engin	engineer; engineering
Engl	English
enl	enlarged
Entom	entomology
Entw	Entwicklung
Entwmech	Entwicklungsmechanik
Epidem	Epidemiology
Episc	episcopalian
Erdk	Erdkunde
Erg	Ergebnis (mostly Ergebnisse)
Ergänzbd	Ergänzungsband
Ergänzh	Ergänzungsheft
ért	értésítő
esc	escuela
esot	esotico
españ	español
espec	especialidad
eston	estonianus ³
estud	estudio
ét	étude
[et al.]	et alii (indicates names of other authors omitted)
Ethnogr	ethnography

Ethnol	Ethnologie
etnol	etnologia
eugen	eugenía; eugenics; Eugenik
Evolut	evolution
exact	exactes
Exam	examination
exot	exotic
exp	experimental; experimentalis
Extern	extermination

F

Fac	facultad
faes	facsimile
Fak	Fakultät
falsif	falsification
farm	farmacologia
fasc	fascicule; fasciculo; fascicul
Fed., féd	federal; federated; federa- tion; fédération
ferrov	ferroviaria
fig	figure
Filip	Filipino
Fin	finska
fiorent	fiorentino
Fir	Firenze
fis	físico
Fish	fishery
fisioer	fisiocritico
fisiol	fisiologia
förh	förhandlingar
fol	folio (not in journal abbreviations)
Fol	Folia; folia
foren	forening
Forh	förhandlingar
form	formes
Forsch	Forschung (also at end of compound words as Zell- forsch.)
Fortbild	Fortbildung
Fortsch	Fortschritt
Found	foundation
fr	français
fr.-belg	franco-belge
Frankf	Frankfurt
Fratern	fraternity
Freib. i. B	Freiburg in Brisgau
freniat	freniatria
front	frontispiece
fürs	fürsorge (at end of abbrevi- ated compound German words)

G

Gac	gaceta
Gard	garden
Gastroenter	gastroenterology
Gaz	gazeta; gazette
Gazz	gazzetta
Geburtsh	Geburtshilfe
Gemeindebl	Gemeindeblatt
Gen	general
gén	général
geneesh	geneesheeren
geneesk	geneeskunde
Genet	genetic
Genève	(not abbreviated)
Genitourin	genitourinary
genoot	genootschap
Genova	(not abbreviated)
geogr	geography
geol	geology

gerichtl.....	gerichtlich
Germ.....	German
Ges.....	Gesellschaft (always capitalized)
ges.....	gesamt (always in the lower case)
Gesch.....	Geschichte; geschiedenis
Geschl.....	Geschlecht
Geschlkr.....	Geschlechtskrankheit
Geschl.leb.....	Geschlechtsleben
Gesundh.....	Gesundheit
Gig.....	gigiena
gin.....	ginecologia
Gior.....	giornale
Glasg.....	Glasgow
glasn.....	glasnik; glasnykh
Gött.....	Göttingen
Gr. Britain.....	Great Britain
Gravenh.....	's Gravenhage
Grenzfr.....	Grenzfragen
Grenzgeb.....	Grenzgebiet
Guard.....	guardian
Gyn.....	gynécologie; gynecology; gynecologicus ³
Gyógysz.....	gyógyszerész; gyógyszerészet (and adjectives)

H

H.....	Heft (only when not part of journal title)
h.....	Heilkunde (only at end of abbreviated German compound words as Kinderh.)
Haag, Haguc.....	der Haag; The Hague
Hälfte.....	(not abbreviated)
hålsöv.....	hålsövård
haemat.....	haematologia
Halbmhefte.....	Halbmonatshefte
hand.....	handlingar
Handb.....	handbook; Handbuch
Health.....	(not abbreviated)
Heat.....	heating
Hebam.....	Hebamme
hebd.....	hebdomadaire (usually discarded from abbreviated title)
Heer. San.....	Heeressanitätswesen
Hefte.....	(not abbreviated when part of journal title)
Heilk.....	Heilkunde (if not part of a compound word, or if preceded by "&c.")
Heilpäd.....	Heilpädagogie
hellén.....	hellénique
Helminth.....	helminthology
Helsin.....	Helsinki
helvet.....	helveticus ³
Hemat.....	hematology
Herb.....	Herbarium
Hered.....	heredity
hetil.....	hetilap
hig.....	higiene
hisp. amer.....	hispano-americano
Hist.....	histoire; history
Histol.....	histology
H. M.....	His Majesty
Homoeop.....	homoeopathy
hondur.....	hondureña
hóp.....	hôpital
horticult.....	horticulture
Hosp.....	hospital; hospitalario
Hrsg.....	Herausgeber; herausgegeben
humain.....	humaines
humaine.....	(not abbreviated)

humane.....	(not abbreviated)
Hydr.....	hydrology
Hydrob.....	hydrobiology
Hyg.....	hygiene

I

iber. amer.....	ibero-americano
ibid.....	ibidem (indicates that the article was published in the same journal as the preceding one; if the abbreviation ibid. is followed only by a reference to pages, the volume and year are also the same as in the preceding entry)
ident.....	identificação
idr.....	idrologia
idroclim.....	idroclimatologia
igiene.....	(not abbreviated)
Illum.....	illuminating
Illust.....	illustration; illustrazione; illustrated
Immun.....	immunology
Immunforsch.....	Immunitätsforschung
Inc.....	incorporated
Ind.....	Indian
Indép.....	indépendance
Individ.....	individual
indukt.....	induktive
Indust.....	industrial; industry
Inebr.....	inebriety
Ineffic.....	inefficiency
inf.....	infancia; infant; infantile
Infect.....	infectious
Infekt.....	Infektion
Infirm.....	infirmière
Inform.....	informateur; information
infortun.....	infortunistica
ingegn.....	ingegneria
inn.....	inner
Insan.....	insanity
Inst.....	institute
Instr.....	instruction; instructor
Instrum.....	instrument
Insur.....	insurance
Int.....	internal
Int.....	intézet (only in Hungarian publications)
internac.....	internacional
Internat.....	international
Intraven.....	intravenous
Invest.....	investigation
issled.....	issledovatelsky
Ist.....	istituto
ital.....	Italian; italiano
izuch.....	izuchenie
Izv.....	izviest

J

J.....	journal
Jahr.....	(not abbreviated)
Jahrb.....	Jahrbuch
Jahrber.....	Jahresbericht
Jahrg.....	Jahrgang
Jahrkurs.....	Jahreskurse
Jap.....	Japanese; Japonensis
jegyzökve.....	jegyzőkönyve
Jena.....	Jenaer; Jenaisch
jugend.....	jugendlich
jur.....	juristisch
Juven.....	juvenile; juventud

K	
k	kunde (at end of abbreviated German compound words as Schädling ^{sk} .)
kavkaz	kavkazky
Kbh	København
kiad	kiadás; kiadvány
Kinderh	Kinderheilkunde
Kindesalt	Kindesalter
Kir	kirurgie
Kl	Klasse
Klim	Klimatologie
Klin	Klinik; klinisch
könyvt	könyvtár
Közegézs	közegészség; közegészségügy
Közl	közlemények; közlöny
Kolloid	kolloidchemisch
Konf	Konferenz
Kongr	Kongress
Konst	Konstitution; Konstitutionslehre
Konstpath	Konstitutionspathologie
Korbl	Korrespondenzblatt
kórt	kórtan
Kr	Krankheit (at end of abbreviated German words)
Krim	Kriminologie
Kriminalb	Kriminalbiologie
kron	kronika
Kult	Kultur
L	
l	leaf; leaves
Lab	laboratory
Labor	(not abbreviated)
laegeforen	laegeforening
laegevid	laegevidenskab
läk	läkare
Lanc	Lancaster
lap	lapok
Lar. Otol	laryngology and otology
laring	laringologia (when the only subject noun in the abbreviated title)
Laryng	laryngology (when the only subject noun in the abbreviated title)
Lat	Latin
lat. amer	latino-americano
Latv	Latvija
lav	lavoro; lavori (if it means "transactions," "studies")
lavoro	(not abbreviated if it means labor)
leaflet	(not abbreviated)
league	(not abbreviated)
Learn	learned
Lect	lecture
Leg	legal
lég	légal
lek	lekarski; lekarstwo; lekarz
lék	lékař; lékárník; lékařský; lékařství
Lett	letter
Lfg	Lieferung
Libr	library
lijkverbr	lijkverbranding
Lisb	Lisboa
Liter	literature
Liverp	Liverpool
livr	livraison
lombard	lombardo
Lond	London

Los Ang	Los Angeles
Lpz	Leipzig

M	
M	medicine; medical (only in English titles, but never at head of title).
Madr	Madrid
Mag	magazine
Magy	magyar
mal	maladie; malattia
Malariol	malariaologia
Mammal	mammalogy
Manic	manicomio
Manuf	manufacturer
Marb	Marburg
Mat	maternity
Matér	matériel
Math	mathematics
Mber	maandbericht; Monatsbericht
Mbl	Monatsblatt; Monatsblätter
Med	medicina; medicine; Medizin; medizinisch; medicinalis ² ; medicus ³ ; (always in English words when at head of title)
méd	médecine; médico.
Medbeante	Medizinalbeamte
Med. Chir	Medico-Chirurgial
med. chir	medico-chirurgico
Medded	meddedelser
Meded	mededeeling(en)
Med. Leg	medico-legal
Medverwalt	Medizinalverwaltung
Meet	meeting
Melb	Melbourne
Mem	memoirs; memorandum; memorial (in all languages)
mens	mensuel
menschl	menschlich
Ment	mental
Mess	message; messenger
Metab	metabolic
Metallurgy	(not abbreviated)
Meth	method
Metrop	Metropolitan
mex	Mexicano
Méx	México
Mhefte(no period)	Monatshefte
Mier	microscopic; microscopy
microb	microbiologicus ³
Mikrob	mikrobiologia; Mikrobiologie
Mil	militaire; military
milan	milanese
Milano	(not abbreviated)
Min	Minister; ministerium
minor	minorenni
Minutes	(not abbreviated)
Misc	miscellaneous
Mitt	Mitteilung
mod	modern
Mod	Modena (always as place of publication)
M. Off	medical officer
Monit	Monitore
Monogr	monography
Montev	Montevideo
Month	monthly
Montpel	Montpellier
morf	morfologia
Morph	morphology
Mosk	moskovski
movim	movimento

MS	manuscript
M. & S	medical and surgical; medicine and surgery (in this combination always to be used)
M Schr	maandschrift; Monatsschrift
Münch	München; Münchener
Mun	municipal
Mus	museum
mutil	mutilato

N

N	new (only in compound English proper names as N. England)
N	north (only when followed by geographical names of continents or states)
nac	nacional
Nachr	Nachricht
nap	napoletano
Nap	Napoli
Nat	national
Natur	natural; naturalist; naturel
Naturgesch	Naturgeschichte
Naturwiss	Naturwissenschaft
nauch	nauchny
Nav	naval
Navy	(not abbreviated)
naz	nazionale
n. d.	no date
Ned	Nederlandsch
néerl.	néerlandais
Nervenh	Nervenheilkunde
Nervenleb	Nervenleben
Neur	Neurologie; neurologist; neurologia; neurologicus ³
Neurob	neurobiologia; Neurobiologie
Neuropath	Neuropathology
nevropat	nevropatologia
News	(not abbreviated)
n. F	neue Folge
nipiol	nipiologia
No	number; número; nummer
nord	nordisk
North	northern
nouv	nouveau; nouvelle
Nov	novaia
Novit	novitas (-ates)
n. p	no place of publication
n. ser	new series
Nürnb	Nürnberg
numism	numismatics
Nurs	nurses; nursing
Nutrit	nutrition
N. Y.	New York

O

Observ	observador
Obst	obstetrics; obstetricus ³
obzor	(not abbreviated)
Occas	occasional
Occup	occupational
Oceanogr	oceanographic
ocul	oculistica; oculistique
Odes	odessky
odont	odontoiatry; odontology
öff	öffentlich
összehas	összehasonlító
Oesterr., or österr.	österreich
Of	Oficina
Off	Officer; Office; official
oft	oftalmologia

Ohr	Ohren- (usually followed by &c.)
okhr	okhrana
oph	ophthalmologie
Ophth	ophthalmology; ophthalmologicus ³
Optic	optical
Optics	(not abbreviated)
Optometr	optometrist
ord	ordine
oreille	(not abbreviated)
org	organ; organization
Organother	Organotherapy
orient	orientalis ²
Orsz	országos
Orthodont	orthodontist
orthop	orthopaedicus ³ ; orthopädisch
Orthopsychiat	orthopsychiatry
ortop	ortopedia
orv	orvos; orvosi
Osp	ospedale
Osteopath	osteopathic
ostet	ostetricia
Otol	otologia; otology
otolar	otolaryngologie; otolaryngologicus ³
otoneur	otoneuro-oculistique
otorinolar	otorinolaringologia
ottalm	ottalmologia
Oxf	Oxford

P

P	page
pädag	pädagogisch
paediat	paediatricus ³
Pal	Palermo
Paleont., paléont.	paleontology; paléontology
Pamphl	pamphlet
panamer	panamericano
Papers	(not abbreviated)
Par	Paris
paracels	Paracelsicus ³
Parasit	parasitology
pat	patologia
Path	Pathology; pathologicus ³
paul	paulista (referring to S. Paulo)
Pediat	pediatry
pedol	pedologia
pellagr	pellagologica
Periodont	periodontology
pfälz	pfälzisch
pfl	pflge (at end of compound words)
Pharm	pharmacy; pharmacology; Pharmacopoeia; Pharmakologie
pharm. dyn	pharmacodynamic
pharm. ther	pharmaco therapeutisch
Phila	Philadelphia
philanthrop	philanthropique
philomath	philomathique
Philos	philosophy
Phonet., phonét.	phonetics; phonétique
Photogr	photography
phtisiol	phtisiologie
Phys	physics; physical; physikalisch; physique
Physician	(not abbreviated)
Physiol	physiology
Pittsb	Pittsburgh
pl	plate
p. l	preliminary leaves
plast	plastique

polit	politica
polon	Polonais
Pop	popular
Port	Portuguese
portr	portrait
posit	positive; positiva
Postgrad	postgraduate
Pract	practice; practitioner
Prakt	Praktiker; praktisch
prat	pratica; pratique
Prax	Praxis
Presid	president
Press, Presse	(not abbreviated)
Preuss	preussisch
prev	preventive
provid	providenza
Probl	problems
Proc	proceedings
Proct	proctology
Profes	professional
profil	profilakticheský
Progr	progress; progressive
Promot	promotion
Prophyl	prophylactic; prophylaxis
protec	protección
Protistenk	Protistenkunde
przegł	przegląd
przyrod	przyrodniczy; przyrodoznawstwo; przyrodzenie
pseud	pseudonym
psikhiat	psikhiatria
psikhol	psikhologia
psiquiat	psiquiatria
Psychiat	Psychiatrie; psychiatricus ³
Psychic	psychical
Psychoanal	Psychoanalysis
Psychol	psychology; psychologicus ³
Psychopath	psychopathology
Psychother	Psychotherapie
psicol	psicologia
psicoped	psicopedagógico
pt (no period)	part
Pub	public; publication
Pubb	pubblicazione
puericult	puericultura
pur	pures
P. verb	procès-verbaux

Q

Q	quarterly
Quarant	quarantine
Quest	question
quir	quirúrgica

R

R	royal
r ^e	recto (right-hand page)
Radiol	radiology; radiologicus ³
Radiother	radiotherapy
Radium	(not abbreviated)
Railw	railway
rak	raksti
ran	ranny; rano
Rapp	rapport
Rass	rassegna
Rassenb	Rassenbiologie
Rdsch	Rundschau
Rec	record; recueil
Ref	referati
reflex	reflexologia
Reg	register
Region	regional
Rehabil	rehabilitation

Reichsanst	Reichsanstalt
Reichsgesundh-	Reichsgesundheitsamt
amt	
Rel	releases
rend	rendu
Rendic	rendiconto
rentg	rentgenologia
Rep	report
Repert., répert	repertorio; répertoire
Repr	reprint
repúb	república
Res	research
resp	respiratoire; respiratoria
Resumpt	resumptio
rev	revised (only in book titles)
Rev	review; revue; revista
rheumat	rheumaticus ³
Rhinol	rhinology
Ricer	ricerche
Rio	Rio de Janeiro
Riv	rivista
Roentg	Roentgen; roentgenology
rom	romande
roumain	roumaine; roumaines
rozhl	rozhledy
rozpr	rozprawy
Russ	Russian; russky

S

S	saint, san, são (in compound proper names)
	south (with geographical names)
	surgery (only in the combination: M. & S.)
S. Franc	San Francisco
S. Paulo	São Paulo
Sachverst	Sachverständig
sächs	sächsisch
säll	sällskapet
Säugl	Säugling
sal	salude
Samml	Sammlung
san	sanidad; sanitario; sanitary
Sanat	sanatorium
Sanit	sanitarium
Sborn	sbornik
Sc	science; scientific;
scand	Scandinavicus ³
Schles	Schlesisch
Schl. Holstein	Schleswig-Holstein
Schola	(not abbreviated)
school	(not abbreviated)
Schr	Schrift
Schweiz	schweizerisch
scol	scolaire
Secr	Secretaría; secretary
Sect	section
Sekret	Sekretion
Sekt	Sektion
Sem	semana; semaine
Ser., sér	series
Serother	Serotherapy
Serv	service
sess	sessuale
Sex	sexology; sexual
Sexforsch	Sexualforschung
Sez	sezione
sezda	(not abbreviated)
sicil	siciliano
sieroter	sieroterapico
sif	sifilologia
sig	signature
Sightsav	sightsaving

Sitz	Sitzung	tisiol	tisiologia
Sitzber	Sitzungsbericht	Tor	Torino
Skand	Skandinavisch	tp	title-page
slav	slavicus ³	Tr	transactions; trudi; travaux; trabajos
Smithson	Smithsonian	Training	(not abbreviated)
Soc	society; societās; società; sociedad; sociedade; socie- tat; société, etc.	transl	translated; translation
	(not abbreviated)	Traumat	traumatology
Social	(not abbreviated)	travmat	travmatologia
Sociol	sociology	trent	trentino
South	southern	trimest	trimestral
Southwest	Southwestern	Trop	tropical
Sovet	sovetsky	truda	(not abbreviated)
Soz	Sozietät	tschr	tijdschrift
sozial	soziale	Tsentr	tsentralniy
Spec	specialità; special	tskr	tidskrift
sper	sperimentale	Tuberc	tuberculosis; tuberculozeus ³
Springf	Springfield	Tuberk	Tuberkulosis; tuberkulez
sred	sredne	Tüb	Tübingen
st	stiintelor	tunis	tunisienne
st	-stadt (occurs in geographi- cal names ending in -stadt as Darmst.)		
		U	
Sta	station	udg	udve; udgaver; udgivet
Staatsinst	Staatsinstitut	übers	übersetzt
Stand	standard	Uff	ufficio
State	(not abbreviated, but mostly omitted from journal titles)	ugeskr	ugeskrift
Statist	statistics; Statistik; statis- tisch	utg	utgaaf
statiszt	statisztika	ujš	ujšag
Stift	Stiftung	U. K.	United Kingdom
Stockh	Stockholm	ultraviol	ultravioletto
Stomat	stomatology	Unfallchir	Unfallchirurgie
stor	storia	Ungar	ungarisch
Strasb	Strasbourg	Unit	United (other than United States)
Stud	Study; studio; Studien	Univ	Universität; university; uni- versità; universidad
Stuttg	Stuttgart	Untersuch	Untersuchung (even in com- pound words)
Sudeb	sudebno	untersuch	-untersuchung
Suggest	suggestive	Upps	Uppsala
Suggestion	(not abbreviated)	Urol	urology
suiss	suisses	urug	uruguayano
Summary	(not abbreviated)	U. S.	United States
sundh	sundhed	usov	usovershenstvovanie
Sunti	(not abbreviated)	Uzhn	uzhny
Suppl	supplement		
Surg	Surgery (but M. & S.)	V	
Surgeon	(not abbreviated)	V	volume
Surg. Gen	Surgeon-general	v ^o	verso (left-hand page)
Surv	survey	valene	valenciano
Sven	svensk	vaterl	vaterländisch
synd	syndicat	vener	venerologicus ³
Syph	Syphilis; syphilology	vénér	vénérien
szemle	(not abbreviated)	venet	veneto
		Venez	Venezia
T		venczol	venezolano
T	Teil; tome	ventil	ventilating
tab	table	veracruz	veraacruzano
Tägl	täglich	verb	verbessert
tandheelk	tandheelkunde	Verdauungskr	Verdauungskrankheit

SYMBOLS

&.....	and, e, és, et, og, y, (and so on)
&c.....	and so on; et cetera; und so weiter; s a többi; (indicates omitted words; in references to abbreviated book titles it is always in brackets; if without brackets, it is in the original title)
4°.....	quarto
8°.....	octavo
16°.....	sedecimo
*.....	indicates dissertations (Academische afhandling; Inaugural-Dissertation Proefschrift; thèse, etc.)
[].....	(1) in author entries the brackets indicate additions, omissions or other changes; after the title of a dissertation the name of the university at which the work was written is in brackets; (2) they also indicate that the title has been translated into English, or otherwise modified.

Part 2.—ABBREVIATIONS OF TITLES OF SERIAL PUBLICATIONS*

A

Aarsber. sundhtilst. K�benhavn	1. Aarsberetning angaaende sundhedstilstanden i K�benhavn. K�benhavn.
Abh. Augenh.	3. Abhandlungen aus der Augenheilkunde und ihren Grenzgebieten. Berlin.
Abh. Bayer. Akad. Wiss.	4. Abhandlungen der Bayerischen Akademie der Wissenschaften. M�nchen.
Abh. Geburtsh.	5. Abhandlungen aus der Geburtsh�lfte und Gyn�kologie und ihren Grenzgebieten. Berlin.
Abh. Gesch. Vetmed.	6. Abhandlungen aus der Geschichte der Veterin�rmedizin. Leipzig.
Abh. inn. Sekret., Budap.	7. Abhandlungen aus den Grenzgebieten der inneren Sekretion. Budapest.
Abh. jur. med. Grenzgeb., Wien	8. Abhandlungen aus dem juristisch-medizinischen Grenzgebiete. Wien.
Abh. Kinderh.	9. Abhandlungen aus der Kinderheilkunde und ihren Grenzgebieten. Berlin.
Abh. klin. Zahnh.	10. Abhandlungen aus dem Gebiete der klinischen Zahnheilkunde. Berlin.
Abh. Med. Fak. Sun Yatsen Univ.	11. Abhandlungen der Medizinischen Fakult�t der Sun Yatsen-Universit�t. Canton.
Abh. Neur. Psychiat.	12. Abhandlungen aus der Neurologie, Psychiatrie, Psychologie und ihren Grenzgebieten. Berlin.
Abh. Preuss. Akad. Wiss.	13. Abhandlungen der Preussischen Akademie der Wissenschaften. Berlin.
Abh. Psychother.	14. Abhandlungen aus dem Gebiete der Psychotherapie und medizinischen Psychologie. Stuttgart.
Abh. Sexforsch.	15. Abhandlungen aus dem Gebiete der Sexualforschung. Berlin.
Abh. theor. Biol.	16. Abhandlungen zur theoretischen Biologie. Berlin.
Abstr. Papers Fever Conf.	17. Abstracts of papers and discussions ... annual Fever Conference [U. S.; at various places]
Abstr. Proc. Ass. Life Insur. M. Dir. America	18. Abstract of the proceedings of the ... annual meeting of the Association of Life Insurance Medical Directors of America [various places]
Abstr. Proc. U. S. Pharm. Convent.	19. Abstracts of proceedings; United States Pharmacopoeial Convention. Washington.
Abstr. Theses Univ. Aberdeen	20. Abstracts of theses accepted by the University for higher degrees. Aberdeen.
Abstr. Theses Univ. Chicago	21. Abstracts of theses submitted to the Graduate Faculty of the University of Chicago for the degree of doctor of philosophy. Chicago.
Accid. Bull.	22. Accident bulletin [at head of tp.: Interstate Commerce Commission] Washington.
Acta aerophysiol., Hamb.	23. Acta aerophysiologicala. Hamburg.
Acta biol. exp., Warsz.	24. Acta biologiae experimentalis. Warszawa.
Acta brevia neerl.	25. Acta brevia neerlandica de physiologia, pharmacologia, microbiologia, e. a. Amsterdam.
Acta chir. scand.	26. Acta chirurgica Scandinavica. Stockholm.
Acta derm., Kyoto	27. Acta dermatologica. Kyoto.
Acta derm. vener., Stockh.	28. Acta dermato-venereologica. Stockholm.
Acta gyn. scand.	29. Acta gynecologica Scandinavica. Helsingfors.
Acta leiden.	30. Acta Leidensia (Mededeelingen uit het Instituut voor tropische geneeskunde. Leiden) Leiden.
Acta med., Kharkov	31. Acta medica. Kharkov.
Acta med. Keijo	32. Acta medicinalia in Keijo. Keijo, Jap. [See also No. 1594]
Acta med. scand.	33. Acta medica Scandinavica. Stockholm.

* Since 1932, when the printing of the Fourth Series of the Index-Catalogue started, repeated attempts have been made to produce a list of abbreviations handy for both the Library and the Public Printer. The present list, the result of experience gained in editing and printing the first and second volumes, makes the abbreviations standard for future issues of the Index-Catalogue.
